Yau Ma Tei East

Contract No. HY/2014/08

July 2019

Environmental Permit No. EP-457/2013/C

Central Kowloon Route

Independent Environmental Checker Verification

Works Contract:

Yau Ma Tei East (HY/2014/08)

Reference Document/Plan

Document/~~Plan~~ to be Certified/ Verified: Monthly EM&A Report No.16 (July 2019)

Date of Report: 12 August 2019 (Rev.2)

Date received by IEC: 12 August 2019

Reference EP Condition

Environmental Permit Condition: 3.4

Submission of Monthly EM&A Report of the Project

3.4 Four hard copies and one electronic copy of monthly EM&A Report shall be submitted to the Director within 2 weeks after the end of each reporting month throughout the entire construction period. The EM&A Reports shall include a summary of all non-compliance. The submissions shall be certified by the ET Leader and verified by the IEC as complying with the requirements as set out in the EM&A Manual before submission to the Director. Additional copies of the submission shall be provided to the Director upon request by the Director.

IEC Verification

I hereby verify that the above referenced document/~~plan~~ complies with the above referenced condition of EP-457/2013/C.

Ms Mandy To

- Q. Interim Report for the Complaint

EXECUTIVE SUMMARY

- A.1 Build King – SKEC Joint Venture (“Contractor”) commenced the construction works of Highway Department (HyD) Central Kowloon Route Contract No. HY/2014/08 – Section of Yau Ma Tei East (“The Project”) on 20 April 2018. This is the 16th monthly Environmental Monitoring and Audit (EM&A) report presenting the EM&A works carried out during the period from 1 July 2019 to 31 July 2019.
- A.2 A summary of the construction works that undertaken for the Project during the reporting month is listed below.

Construction Activities undertaken

- Excavation to FFL and underground drainage works at Methadone Clinic Phase 2
- King Post, Sheet Piling, Excavate & Construct Ground Floor Beam/Slab and underpinning of Piers at Zone E
- Grouting Works at Yau Ma Tei Police Station (YMTPS)
- Prebored socket H-pile at Yau Ma Tei Police Station (YMTPS)
- Excavation and Lateral Support (ELS), Excavation and Construct Pile Cap at temporary Public Library cum Jade Hawker Bazaar Building (TPLBJHB)
- Building Services (BS) Works and Architectural Builders Works and Finishes (ABWF) Works for Ground Floor and first floor at Temporary Maternal and child health Centre (TMCHC)
- Superstructure Construction R/F to Upper Roof at TMCHC
- Install sheet piles, king posts, pump wells and excavation down to +1.5mPD, capping beam/traffic deck and implement TTA at Zone A

- A.3 A summary of regular construction noise and construction dust monitoring activities in this reporting period is listed below:

Regular construction noise monitoring during normal working hours

W-N1A, W-N18, W-N25A, W-P11 5 times

Construction dust (24-hour TSP) monitoring

W-A1 6 times

W-A6 (5 valid samples, 1 voided samples)
5 times

Construction dust (1-hour TSP) monitoring

W-A1, W-A6 15 times

- A.4 No construction work was conducted during time period other than normal working hours during this reporting month.

- A.5 Inert construction and demolition (C&D) materials and non-inert C&D materials were the wastes that generated from this Project. During July 2019, 11897.3 tonnes inert C&D material was generated from the Project. 5460 tonnes inert C&D material was sent to public fill and 6437.3 tonnes inert C&D material was reused in other Projects. No plastics, metal and paper/cardboard packaging was generated and sent to recyclers for recycling during

reporting period. About 98.4 tonnes of non-recyclable non-inert C&D materials, such as general refuse, were disposed of at landfill. 0 kg of chemical waste was generated during this reporting month.

- A.6 Bi-weekly inspection of the implementation of landscape and visual mitigation measures was conducted on 11, 25 July 2019. Details of the audit findings and implementation status are presented in Section 5.
- A.7 Joint weekly site inspections were conducted by representatives of the Contractor, Engineer and Contractor's ET on 4, 11, 18, 25 July 2019. Details of the audit findings and implementation status are presented in Section 5.
- A.8 No change has been made from the described in the approved EM&A, such as construction method, mitigation proposals and design changes.
- A.9 One exceedance of the Action Level of regular construction noise monitoring was recorded on 15 July 2019. Immediate actions have been taken. No further exceedance of the Action Level of regular construction noise monitoring was recorded during the remaining of the reporting period. No exceedance of the Limit Level of regular construction noise monitoring was recorded during the reporting period.
- A.10 No exceedance of the Action and Limit Levels of 24-hour TSP and 1-hour TSP monitoring were recorded during the reporting period.
- A.11 Two environmental complaints were received in the reporting month on 15 July 2019 from EPD and 16 July 2019 from hotline (received on 28 July 2019 by ETL). After investigation with the Contractor and conclusion on 16 July 2019 and 7 August 2019 for the two complaints respectively, actions have been taken for both cases. The interim reports for the complaints are shown in Appendix Q. Further mitigation measures were implemented on site for precautionary purpose for the case received on 15 July 2019.
- A.12 One non-compliance with the approved EIA Report and Noise Control Ordinance was spotted for the case received on 29 July 2019 by ETL, investigation finding showing the cause forcing the situation was included in the interim report. No further non-compliance situation was observed in the remaining of this reporting period.
- A.13 No summon or prosecution was received in this reporting period.
- A.14 No reporting changes were revised in this reporting period.
- A.15 A summary of the construction activities to be undertaken in the next reporting month is listed below:

Construction Activities to be undertaken

- End user relocation works, rectification of defects, demolition works for Phase 2, existing electrical duct diversion for Phase 2 works and excavation for Phase 2 works of MC
- Excavation down to -0.5mPd at Zone E (YMTAS)
- Construction of Ground Beam and Slab at Zone E (YMTAS)

Construction Activities to be undertaken

- Construction of super structure , ABWF and E&M works at TMCHC
 - King Post Construction at Zone A
 - Drilling Pump Well at Zone A
 - Excavation down to +1.5mPD at East Bound (E/B) of Zone A.
 - Construction of capping beam and roof slab at Zone A
 - Construction of temporary slip road at Zone A for implementation of Temporary Traffic Arrangement (TTA) stage 2.
 - Divert the CLP cable back to original position, install sheet piles and demolish the remaining subway at Zone A.
 - Grouting Works at YMTPS
 - UU diversion and ELS work at TPLCJHB
 - Modification of Yau Cheung Road
 - Installation of instrumentation for all areas
-

1. BASIC PROJECT INFORMATION

- 1.1. Central Kowloon Route (CKR) is a 4.7 km long dual 3-lane trunk road in Central Kowloon linking Yau Ma Tei Interchange in West Kowloon with the road network on Kai Tak Development and Kowloon Bay in East Kowloon.
- 1.2. The Central Kowloon Route – Design and Construction Environmental Impact Assessment Report (Register No.: AEIAR-171/2013) was approved with conditions by the Environmental Protection Department (EPD) on 11 July 2013. An Environmental Permit (EP 457/2013) was issued on 9 August 2013. Variations of EP (VEP) was subsequently applied for and the latest EP (EP-457/2013/C) was issued by EPD on 16 January 2017. A Further EP (FEP-02/457/2013/C) was issued by EPD on 5 March 2018.
- 1.3. The construction of the CKR had been divided into different sections. This Contract No. HY/2014/08 – Section of Yau Ma Tei East (YMTE) covers part of the construction activities located at Yau Ma Tei under the EP and FEP which includes:
 - Section of Yau Ma Tei East
 - i. Construction of Cut-and-Cover Tunnel in compliance with all statutory requirements and the requirements specified under the Contract while maintaining the traffic with all necessary provisions
 - ii. Construction and subsequent handover of Yau Ma Tei Access Shaft for facilitating the access and use by the contractor of Central Kowloon Route - Central Tunnel contract
 - iii. Demolition of existing buildings including Yau Ma Tei Multi-storey Carpark Building, Yau Ma Tei Specialist Clinic Extension Building and Yau Ma Tei Jade Hawker Bazaars
 - iv. Demolition and re-provisioning of Gascoigne Road Flyover(GRF) and the underpinning works for the existing Ferry Street Flyover and Yau Ma Tei Police Station New Wing Building
 - v. Construction of civil provisions and coordination with the contractor of Central Kowloon Route - Tunnel Electrical & Mechanical contract
 - vi. Design and construction of Noise Barrier Works
 - vii. Prepare TTA proposals, discuss at TMLG meeting and obtain its agreement and approval/ endorsement from relevant authorities at suitable times to enable the execution of the Works

The alignment and works area for the Contract No. HY/2014/08 - are shown in Appendix A.

- 1.4. A summary of the major construction activities undertaken in this reporting period is shown in Table 1.1. The construction programme is presented in Appendix B.

Table 1.1 Summary of the construction Activities Undertaken during the Reporting Month.

Construction Activities undertaken

- Excavation to FFL and underground drainage works at Methadone Clinic Phase 2
- King Post, Sheet Piling, Excavate & Construct Ground Floor Beam/Slab and underpinning of Piers at Zone E
- Grouting Works at Yau Ma Tei Police Station (YMTPS)
- Prebored socket H-pile at Yau Ma Tei Police Station (YMTPS)
- Excavation and Lateral Support (ELS), Excavation and Construct Pile Cap at temporary Public Library cum Jade Hawker Bazaar Building (TPLBJHB)
- Building Services (BS) Works and Architectural Builders Works and Finishes (ABWF) Works for Ground Floor and first floor at Temporary Maternal and child health Centre (TMCHC)
- Superstructure Construction R/F to Upper Roof at TMCHC
- Install sheet piles, king posts, pump wells and excavation down to +1.5mPD, capping beam/traffic deck and implement TTA at Zone A

- 1.5. There are no updates on the scope of works and construction methodologies.
- 1.6. The project organisational chart specifying management structure and contact details are shown in Appendix C.
- 1.7. A summary of the valid permits, licences, and /or notifications on environmental protection for this Project is presented in Table 1.2

Table 1.2 Summary of the Status of Valid Environmental Licence,
Notification, Permit and Documentations

Permit/ Licences/ Notification	Reference	Validity Period
Environmental Permit	EP-457/2013/C	Throughout the Contract
Further Environmental Permit	FEP-02/457/2013/C	Throughout the Contract
Notification of Construction Works under the Air Pollution Control (Construction Dust) Regulation (Form NA)	429806	Throughout the Contract
Wastewater Discharge Licence	WT00030660-2018	31 March 2023
Chemical Waste Producer Registration	WPN5213-225-B2526-01	Throughout the Contract
Construction Noise Permit at Portion 22 & 22A(Renewal)	GW-RE0250-19	8 April 2019 to 7 October 2019
Construction Noise Permit at Zone A & MCHC	GW-RE0528-19	4 July 2019 to 2 January 2020
Construction Noise Permit for at Methadone Clinic (Renewal)	GW-RE0290-19	3 April 2019 to 18 October 2019
Construction Noise Permit at Zone E (Renewal)	GW-RE0337-19	27 April 2019 to 26 July 2019
Construction Noise Permit at Temporary Library	GW-RE0551-19	10 July 2019 to 1 October 2019
Construction Noise Permit at Zone C	GW-RE0479-19	18 June 2019 to 12 December 2019

Permit/ Licences/ Notification	Reference	Validity Period
Billing Account for Disposal of Construction Waste	7029997	Throughout the Contract
Dumping at Sea Permit (Type 1 – Open Sea Disposal)	EP-MD-20-014	1 June 2019 to 30 November 2019

2. ENVIRONMENTAL STATUS

2.1. Environmental permit (EP) conditions under the EIAO, submission status under the EP and implementation status of mitigation measures had been reviewed and implemented on schedule. The status of required submissions under the EP (EP-457/2013/C) and FEP (FEP-02/457/2013/C) as of the reporting period for the Project are summarised in Table 2.1

Table 2.1 Summary of Status of Required Submission for EP-457/2013/C and FEP-02/457/2013/C for the Project

EP/FEP Condition (EP-457/2013/C) (FEP-02/457/2013/C)	Submission	Submission date
Condition 1.12	Notification of Commencement Date of Construction of the Project	20 Mar 2018
Condition 2.3	Community Liaison Group	23 Nov 2017
Condition 2.4	Management organisation of the main construction companies	9 Feb 2018
Condition 2.5	Construction Programme and EP Submission Schedule	26 Feb 2018
Condition 2.6	Design Drawing	26 Feb 2018
Condition 2.7	Cultural Heritage Mitigation Plan	7 Mar 2019
Condition 2.8	Landscape Mitigation Plan	9 Mar 2018
Condition 2.9	Construction Noise Mitigation Measure Plan (CNMMP)	23 Jul 2019
Condition 3.3	Baseline Monitoring Report	6 Apr 2018
Condition 3.4	Monthly EM&A Report (June 2019)	10 Jul 2019

2.2. Details of the major construction activities undertaken in this reporting period are shown in Table 2.2.

Table 2.2 Summary of the construction Activities Undertaken during the Reporting Month.

Construction activities undertaken	Remarks on progress
• Excavation to FFL and underground drainage works at Methadone Clinic Phase 2	• 70%
• King Post, Sheet Piling, Excavate & Construct Ground Floor Beam/Slab at Zone E	• 39% completion
• Grouting Works at Yau Ma Tei Police Station (YMTPS)	• 7% completion
• Prebored socket H-pile at Yau Ma Tei Police Station (YMTPS)	• 6% completion
• Excavation and Lateral Support (ELS), Excavation and Construct Pile Cap at temporary Public Library cum Jade Hawker Bazaar Building (TPLBJHB)	• 45% completion

Construction activities undertaken	Remarks on progress
• Superstructure Construction R/F to Upper Roof at Temporary Maternal and child health Centre (TMCHC)	• 98% completion
• Building Services (BS) Works and Architectural Builders Works and Finishes (ABWF) Works for Ground floor and first floor of TMCHC	• 52% completion
• Install sheet piles, king posts, pump wells and excavation down to +1.5mPD a, capping beam/traffic deck and implement TTA at Zone A	• 73% completion

2.3. The drawing showing the project layout and the location of the monitoring station and environmental sensitive receivers are attached in Appendix A and Appendix K. Co-ordinates of the monitoring location is shown in below:

Monitoring Location	Location ID	Latitude	Longitude
Yau Ma Tei Catholic Primary School (Hoi Wang Road)	W-A1/ W-N1A	22.313357	114.16409
Man Cheong Building	W-A6	22.308185	114.166033
Hydan Place	W-N18	22.30858	114.170185
Prosperous Garden Block 1	W-N25A	22.309846	114.168072
The Coronation Tower 1	W-P11	22.309824	114.165616

3. MONITORING RESULTS

3.1. Monitoring Parameters

Air Quality

- 3.1.1. The impact monitoring had been carried out in accordance with section 5.8 of the approved EM&A Manual to determine the 1-hour and 24-hour total suspended particulates (TSP) levels at the monitoring locations in the reporting month.
- 3.1.2. The sampling frequency of at least once in every 6 days, shall be strictly observed at the monitoring stations for 24-hour TSP monitoring. For 1-hour TSP monitoring, the sampling frequency of at least 3 times in every 6 days should be undertaken when the highest dust impact occurs.
- 3.1.3. General meteorological conditions (wind speed, direction and precipitation) and notes regarding any significant adjacent dust producing sources had also been recorded throughout the impact monitoring period.

Noise

- 3.1.4. Construction noise level shall be measured in terms of the A-weighted equivalent continuous sound pressure level (L_{eq}). L_{eq} (30min) shall be used as the monitoring parameter for the time period between 0700 and 1900 hours on normal weekdays.
- 3.1.5. For all other time periods, L_{eq} (5min) shall be employed for comparison with the Noise Control Ordinance (NCO) criteria.
- 3.1.6. As supplementary information for data auditing, statistical results such as L_{10} and L_{90} shall also be obtained for reference.

3.2. Monitoring Equipment

Air Quality

- 3.2.1. 1-hour TSP levels and 24-hour TSP had been measured with direct reading dust meter and High Volume Samplers respectively. It has been demonstrated its capability in achieving comparable results with high volume sampling method as set out in the Title 40 of the Code of Federal Regulations, Chapter 1 (Part 50).
- 3.2.2. The 1-hour TSP meter was calibrated by the manufacturer prior to purchasing. Zero response of the instrument was checked before and after each monitoring event. Operation of the 1-hour TSP meter followed manufacturer's Operation and Service Manual. The 24-hour TSP meter was calibrated against firmware 80570-8100-V1.0.4, annually. Operation of the 24-hour TSP meter followed manufacturer's Operation and Service Manual. Valid calibration certificate of dust monitoring equipment is attached in Appendix H.
- 3.2.3. A summary of the equipment that was deployed for the 24- hour averaged monitoring is shown in Table 3.1. The TSP monitoring was conducted as per the schedule presented in Appendix G.

- 3.2.4. The equipment used for 1-hour TSP and 24-hour TSP measurement and calibration are summarised in Table 3.1

Table 3.1 Construction Dust Monitoring Equipment

Monitoring Parameter	Monitoring Equipment	Serial Number	Date of Calibration
1-hour TSP	LD-3B Digital Dust Indicator	296093	15 Oct 2018
1-hour TSP	LD-5R Digital Dust Indicator	882150	27 Aug 2018
24-hour TSP	TE-5170X High Volume Sampler	1050	3, 20 Jul 2019
	TE-5170X High Volume Sampler	1049	3, 15 Jul 2019
	TE-5025A Calibration Kit	3465	22 Jan 2019

Noise

- 3.2.5. Sound level meter in compliance with the International Electrotechnical Commission Publications 651: 1979 (Type 1) and 804: 1985 (Type 1) specifications has been used for carrying out the noise monitoring. The sound level meter has been checked using an acoustic calibrator. The wind speed and other metrological data has been recorded from Hong Kong Observatory- King's Park meteorological station, along with portable wind speed meter stand by as back up if malfunction occurred or data was not recorded from HKO.
- 3.2.6. An acoustic calibrator and sound level meter using for the monitoring is within the valid period and were calibrated per year. Valid calibration certificate of noise monitoring equipment is attached in Appendix I.
- 3.2.7. The details of equipment using for monitoring are listed in Table 3.2, as below:

Table 3.2 Monitoring Equipment Used in Monitoring

Monitoring Equipment	Serial Number	Date of Calibration
Nti XL2 Sound Level Meter	A2A-13661-E0	10 Sep 2018
Pulsar 105 Acoustic Calibrator	63705	11 Sep 2018

3.3. Monitoring Methodology and QA/QC results

Air Quality

- 3.3.1. The 1-hour TSP monitor, portable dust meters (Sibata Digital Dust Indicator Model LD-5R) was used for the impact monitoring. The 1-hour TSP meters provides a real time 1-hour TSP measurement based on 90° light scattering. Three 1-hour TSP level were logged per every six days.
- 3.3.2. The 24-hour TSP monitor, High Volume Samplers (Tisch TE 5170 High Volume Air Sampler) were used for the impact monitoring. The 24-hour TSP monitoring consists of the following:

- ◆ The HVS was set at the monitoring location, with electricity supply connected and secured;
- ◆ HVS was calibrated before commencing the 1st measurement;
- ◆ The filter paper was weight and provided by HOKLAS lab (Acumen Laboratory and Testing Limited and ALS Technichem (HK) Pty Ltd) before and after the sampling. Certificate of HOKLAS accredited laboratory can be referred to Appendix J;
- ◆ The airflow over time during sampling process was recorded by the HVS.

3.3.3. HVSSs were free-standing with no obstruction. The following criteria were considered in the installation of the HVS:

- ◆ Appropriate support to secure the samples against gusty wind needed to be provided the monitoring station;
- ◆ A minimum of 2m separation from walls, parapets and penthouses was required for rooftop samplers;
- ◆ No furnace or incinerator flues was nearby;
- ◆ Airflow around the sampler was unrestricted; and
- ◆ Permission could be obtained to set up the samplers and gain access to the monitoring station.

3.3.4. Preparation of Filter Papers

- ◆ Glass fiber filters were labelled and sufficient filters that were clean and without pinholes were selected;
- ◆ All filters were equilibrated in the conditioning environment for 24 hours before weighing. The conditioning environment temperature was around 25°C and not varied by more than ±3°C; the relative humidity (RH)was 40%; and
- ◆ Acumen Laboratory and Testing Limited and ALS Technichem (HK) Pty Limited, as HOKLAS accredited laboratory, implemented comprehensive quality assurance and quality control programmes on the filters.

3.3.5. Field Monitoring

- ◆ The power supply was checked to ensure that the HVS was working properly;
- ◆ The filter holder and area surrounding the filter were cleaned;
- ◆ The filter holder was removed by loosening the foul bolts and a new filter, with stamped number upward, on a supporting screen was aligned carefully;
- ◆ The filter was properly aligned on the screen so that the gasket formed an airtight seal on the outer edges of the filter;
- ◆ The swing bolts were fastened to hold the filter holder down to the frame. The pressure applied should be sufficient to avoid air leakage at the edges;
- ◆ The shelter lid was closed and secured with an aluminum strip;
- ◆ The HVS was warmed- up for about 5 minutes to establish run- temperature conditions;
- ◆ A new flow rate record sheet was inserted into the flow recorder;
- ◆ The flow rates of the HVS was checked and adjusted to between 1.22-1.37 $m^3\text{min}^{-3}$, which was within the range specified in the EM&A Manual (i.e. 0.6- 1.7 $m^3\text{min}^{-3}$);

- ◆ The programmable timer was set for a sampling period of 24 hours ±hour, and the starting time, weather condition and filter number were recorded;
- ◆ The initial elapsed time was recorded;
- ◆ At the end of sampling, the sampled filter was removed carefully and folded in half so that only surfaces with collected particulate matter were in contact;
- ◆ The filter paper was placed in a clean plastic envelope and sealed; all monitoring information was recorded on a standard data sheet and
- ◆ The filters were sent to (Acumen Laboratory and Testing Ltd and ALS Technichem (HK) Pty Ltd) for analysis.

3.3.6. Maintenance and Calibration

- ◆ The HVS and their accessories were maintained in a good working condition. For example, motor brushes were replaced routinely and electrical wiring was checked to ensure a continuous power supply; and
- ◆ The flow rate of each HVS with mass flow controller was calibrated using an orifice calibrator, Initial calibrations of the dust monitoring equipment were conducted upon installation and prior to commissioning. Five- point calibration was carried out for HVS using TE-5025 Calibration Kit. HVS is calibrated bimonthly. The calibration records for the HVS is given in Appendix H.

3.3.7. Wind Data Monitoring

- ◆ The wind speed has been recorded from Hong Kong Observatory- King's Park meteorological station, along with portable wind speed meter stand by as back up if malfunction occurred or data was not recorded from HKO

Noise

3.3.8. All noise measurements by the meter were set to FAST response and on the A-weighted equivalent continuous sound pressure level (L_{eq}) in decibels dB(A). L_{Aeq(30min)} was used as the monitoring metric for the time period between 0700 –1900 hours on normal weekdays. The measured noise levels were logged every 5 minutes throughout the monitoring period.

3.3.9. Prior to the noise measurement, the accuracy of the sound level meter was checked using an acoustic calibrator generating a known sound pressure level at a known frequency. Checking was conducted before and after the monitoring. The calibration level before and after the noise measurement is agreed to within 1.0 dB(A).

3.3.10. Noise measurements should not be made in presence of fog, rain, wind with a steady speed exceeding 5 ms⁻¹ or wind with gusts exceeding 10 ms⁻¹. The wind speed was checked with a portable wind speed meter capable of measuring with speeds in ms⁻¹.

3.4. Monitoring Locations

Air Quality

3.4.1. During the site visit, both of the original proposed dust monitoring locations were rejected due to the condition at The Coronation was not favorable for monitoring and the

access was declined by the management office of Hong Kong Community College (HKCC) of PolyU. Two alternative air monitoring stations Yau Ma Tel Catholic Primary School (Hoi Wang Road) and Man Cheong Building had been proposed by ET and approved by IEC. 2 designated air monitoring locations were identified and agreed with IEC and EPD. Details of air monitoring stations are described in Table 3.3. The location plan of air quality monitoring stations is shown in Appendix K.

Table 3.3 Location of the Dust Monitoring Stations

Air Quality Monitoring Station	Dust Monitoring Station
W-A1	Yau Ma Tei Catholic Primary School (Hoi Wang Road)
W-A6	Man Cheong Building

Noise

- 3.4.2. During the site visit, one of the original proposed noise monitoring locations Tak Cheong Building was rejected by the president of the owner's corporation. Alternative noise monitoring station Hydan place had been proposed by ET and approved by IEC. 4 noise sensitive receivers designated noise monitoring locations were identified and agreed with IEC and EPD. The designated monitoring stations are identified and access was granted by the premises. The details of noise monitoring station are described in Table 3.4 and the location plan of noise monitoring station is shown in Appendix K.

Table 3.4 Noise Monitoring Stations

Noise Monitoring Station	Identified Noise Monitoring Station	Type of Measurement
W-N1A	Yau Ma Tei Catholic Primary School (Hoi Wang Road)	Façade
W-N18	Hydan Place	Façade
W-N25A	Prosperous Garden Block 1	Façade
W-P11	The Coronation Tower 1	Façade

3.5. Monitoring date, time, frequency and duration

- 3.5.1. A summary of impact monitoring duration, sampling parameter and frequency is presented in Table 3.5.

Table 3.5: Summary of Impact Monitoring Programme

Impact Monitoring	Duration	Sampling Parameter	Frequency
Dust	1-hour continuous measurement	1-hour TSP	3 times per six days
Dust	24-hour continuous sampling	24-hour TSP	Once per six days
Noise	30-minute continuous measurement	$L_{eq\ 30\ min}$, L_{10} and L_{90} as reference.	Once $L_{eq\ 30\ min}$ from 0700 – 1900 per seven days

3.6. Result Summary

Air Quality

- 3.6.1. According to our field observations, the major dust source identified at the designated air quality monitoring station in the reporting month are summarised in Table 3.6

Table 3.6 Observation at Dust Monitoring Station

Monitoring Station	Major Dust Source
W-A1	Nearby traffic, construction work from West Kowloon Government Offices
W-A6	Nearby traffic

- 3.6.2. Air quality impact monitoring for the reporting month was carried out on 3, 9, 15, 20, 26 July 2019 at W-A6; 3, 9, 15, 20, 26 July 2019 for 1-hour TSP and 3, 9, 15, 20, 23, 26 July 2019 for 24-hour TSP at (W-A1).
- 3.6.3. Due to the unstable air flow of high volume sample (HVS) plausibly caused by unstable electricity supply at W-A1, the 24-hour TSP result on 20 July 2019 had been voided.
- 3.6.4. Immediate checking on the air flow rate control component was conducted and the Contractor had been implemented to arrange electricity supply checking. The electricity supply was found normal, monitoring for 24-hour TSP was resumed and an additional monitoring was arranged on 23 July 2019 at W-A1 as a supplement to the voided monitoring result.
- 3.6.5. Scheduled monitoring for 1-hour TSP remained unaffected, only the schedule of 24-hour TSP was affected.
- 3.6.6. The results for 1-hour TSP and 24-hour TSP are summarized in Table 3.7 and Table 3.8. The measurement data and details of influencing factors such as weather conditions and site observation are presented in Appendix L.

Table 3.7 Summary of 1-hour TSP Monitoring Results

Monitoring Location	Range($\mu\text{g}/\text{m}^3$)	Action Level($\mu\text{g}/\text{m}^3$)	Limit Level($\mu\text{g}/\text{m}^3$)
W-A1	49-79	319	500
W-A6	50-79	306	500

Table 3.8 Summary of 24-hour TSP Monitoring Results

Monitoring Location	Range($\mu\text{g}/\text{m}^3$)	Action Level($\mu\text{g}/\text{m}^3$)	Limit Level($\mu\text{g}/\text{m}^3$)
W-A1	6-22	167	260
W-A6	17-38	166	260

Noise

- 3.6.7. According to our field observations, the major noise source identified at the designated noise monitoring station in the reporting month are summarised in Table 3.9:

Table 3.9 Observation at Noise Monitoring Stations

Monitoring Station	Major Noise Source
W-N1A	Nearby traffic, construction work from West Kowloon Government Offices, school activities
W-N18	Nearby traffic
W-N25A	Nearby traffic
W-P11	Nearby traffic

- 3.6.8. The construction noise impact monitoring for the reporting month was carried out on 3, 9, 15, 20, 26 July 2019. The measurement data are shown in Appendix M and summarized in Tables 3.10:

Table 3.10 Summary of Noise Monitoring Results

Time Period	Monitoring location	Parameter	Range, dB(A)			Action Level	Limit Level#
			L _{eq}	L ₁₀	L ₉₀		
Normal working hour from 0700-1900	W-N1A	L _{eq 30min}	52.5-65.0	53.9-67.5	51.2-63.5	When one documented complaint is received	70dB(A) or 65 dB(A) during examination**
	W-N18		58.1-66.3	59.7-68.0	56.0-64.3		75dB(A)#
	W-N25A		59.3-67.4	61.4-69.2	55.3-64.6		
	W-P11		61.7-67.8	63.5-69.6	57.9-65.4		

Remarks: # If works are to be carried out during restricted hours, the conditions stipulated in the construction noise permit by the Noise Control Authority have to be followed.

3.6.9. One exceedance of the Action Level of regular construction noise monitoring was recorded on 15 July 2019 as one complaint was received regarding to construction nosie. Immediate actions have been taken. No further exceedance of the Action Level of regular construction noise monitoring was recorded during the remaining of the reporting period. No exceedance of the Limit Level of regular construction noise monitoring was recorded during the reporting period.

Waste management

3.6.10. The waste generated from this Project includes inert C&D materials, and non-inert C&D materials. Non-inert C&D materials are made up of general refuse, vegetative wastes and recyclable wastes such as plastics and paper/cardboard packaging waste. Steel materials generated from the project are also grouped into non-inert C&D materials as the materials were not disposed of with other inert C&D materials. With reference to relevant handling records and trip tickets of this Project, the quantities of different types of waste generated in the reporting month are summarised in Table 3.11. Details of cumulative waste management data are presented as a waste flow table in Appendix N.

Table 3.11 Quantities of waste generated from the Project

Reporting period	Quantity					
	Inert C&D Materials (in 'tonnes)	Chemical Waste (in '000 Kg)	Non-inert C&D Materials			
			Others, e.g. General Refuse disposed at Landfill (in 'tonnes)	Recycled materials		
				Paper/card board (in '000 Kg)	Plastics (in '000 Kg)	Metals (in '000 Kg)
July-19	11897.3	0.0	98.4	0.0	0.0	0.0

4. SUMMARY OF COMPLAINTS, NOTIFICATION OF SUMMONS AND PROSECUTIONS

4.1. The Environmental Complaint Handling Procedure is shown in below Table 4.1:

Table 4.1 Environmental Complaint Handling Procedure

Complaint Received via Project Hotline	Complaint Received via 1823 or from other government departments
Contractor notify ER, ET and IEC	ER notify Contractor, ET and IEC
Contractor log complaint and date of receipt onto the complaint database. Contractor, ER and ET to conduct investigation of complaint	
If complaint is considered not valid	If complaint is found valid
ET or ER to reply the complainant if necessary	Contractor to identify and implement remedial measures in consultation with the IEC, ET and ER.
The ER, ET and IEC to review the effectiveness of the Contractor's remedial measures and the updated situation; ET to undertake additional monitoring and audit to verify the situation if necessary, and oversee that circumstances leading to the complaint do not recur. ER to conduct further inspection as necessary.	
If the complaint is referred by the EPD, the Contractor to prepare interim report on the status of the complaint investigation and follow-up actions stipulated above, including the details of the remedial measures and additional monitoring identified or already taken, for submission to EPD within the time frame assigned by the EPD	
The ET to record the details of the complaint, results of the investigation, subsequent actions taken to address the complaint and updated situation including the effectiveness of the remedial measures, supported by regular and additional monitoring results in the monthly EM&A reports	

- 4.2. Should non-compliance of the criteria occur, action in accordance with the Action Plan in Appendix D and Appendix E shall be carried out.
- 4.3. One exceedance of the Action Level of regular construction noise monitoring was recorded on 15 July 2019. Immediate actions have been taken. No further exceedance of the Action Level of regular construction noise monitoring was recorded during the remaining of the reporting period. No exceedance of the Limit Level of regular construction noise monitoring was recorded during the reporting period.
- 4.4. Two environmental complaints were received in the reporting month on 15 July 2019 from EPD and 16 July 2019 from hotline (received on 29 July 2019 by ETL). After investigation with the Contractor and conclusion on 16 July 2019 and 7 August 2019 for the two complaints respectively, actions have been taken for both cases. The interim reports for the complaints are shown in Appendix Q. Further mitigation measures were implemented on site for precautionary purpose for the case received on 15 July 2019.
- 4.5. One non-compliance with the approved EIA Report and Noise Control Ordinance was spotted for the case received on 29 July 2019 by ETL, investigation finding showing the cause forcing the situation was included in the interim report. No further non-compliance situation was observed in the remaining of this reporting period.
- 4.6. No notification of summons and prosecution was received in the reporting period.
- 4.7. Statistics on complaints, notifications of summons and successful prosecutions are summarized in Appendix O.

5. EM&A SITE INSPECTION

- 5.1. Site inspections were carried out on a weekly basis to monitor the implementation of proper environmental pollution control and mitigation measures under the Contract. In the reporting period, four (4) site inspections were carried out on 4, 11, 18, 25 July 2019, along with bi-weekly inspection of the implementation of landscape and visual mitigation measures conducted on 11, 25 July 2019.
- 5.2. One joint site inspection with IEC also undertaken on 11 July 2019. Minor deficiencies were observed during weekly site inspection. Key observations during the site inspections are summarized in Table 5.1.

Table 5.1 Site Observations

Date	Environmental Observations	Follow-up Status
4 July 2019	1. Drip tray should be provided for used chemical substance in Zone A.	1. The chemicals were placed back in drip tray at Zone A.
11 July 2019	1. Drip tray should be provided for used chemical substance in Zone A.	1. Chemical substance was collected by subcontractor since the work was completed.
18 July 2019	No major observation was found.	-
25 July 2019	No major observation was found.	-

- 5.3. The Contractor had rectified all observation identified during environmental site inspection in the reporting period.
- 5.4. According to the EIA Study Report, Environmental Permit, contract documents and EM&A Manual, the mitigation measures detailed in the documents are implemented as much as practical during the reporting period. An updated Implementation Status of Environmental Mitigation Measures (EMIS) is provided in Appendix F.

6. FUTURE KEY ISSUES

6.1. Work to be undertaken in the next reporting month are:

- End user relocation works, rectification of defects, demolition works for Phase 2, existing electrical duct diversion for Phase 2 works and excavation for Phase 2 works of MC
- Excavation down to -0.5mPd at Zone E (YMTAS)
- Construction of Ground Beam and Slab at Zone E (YMTAS)
- Construction of super structure , ABWF and E&M works at TMCHC
- King Post Construction at Zone A
- Drilling Pump Well at Zone A
- Excavation down to +1.5mPD at E/B of Zone A
- Construction of capping beam and roof slab at Zone A
- Construction of the temporary slip road at Zone A for implementation of TTA stage 2.
- Divert the CLP cable back to original position, install sheet piles and demolish the remaining subway at Zone A
- Grouting Works at YMTPS
- UU diversion and ELS work at TPLCJHB
- Modification of Yau Cheung Road
- Installation of instrumentation for all areas

Potential environmental impacts arising from the above construction activities are mainly associated with dust, construction noise and waste management.

- 6.2. The tentative schedule of regular construction noise monitoring, 1-hour TSP and 24-hour TSP monitoring in the next reporting period is presented in Appendix P.
- 6.3. The construction programme for the Project for the next reporting month is presented in Appendix B.

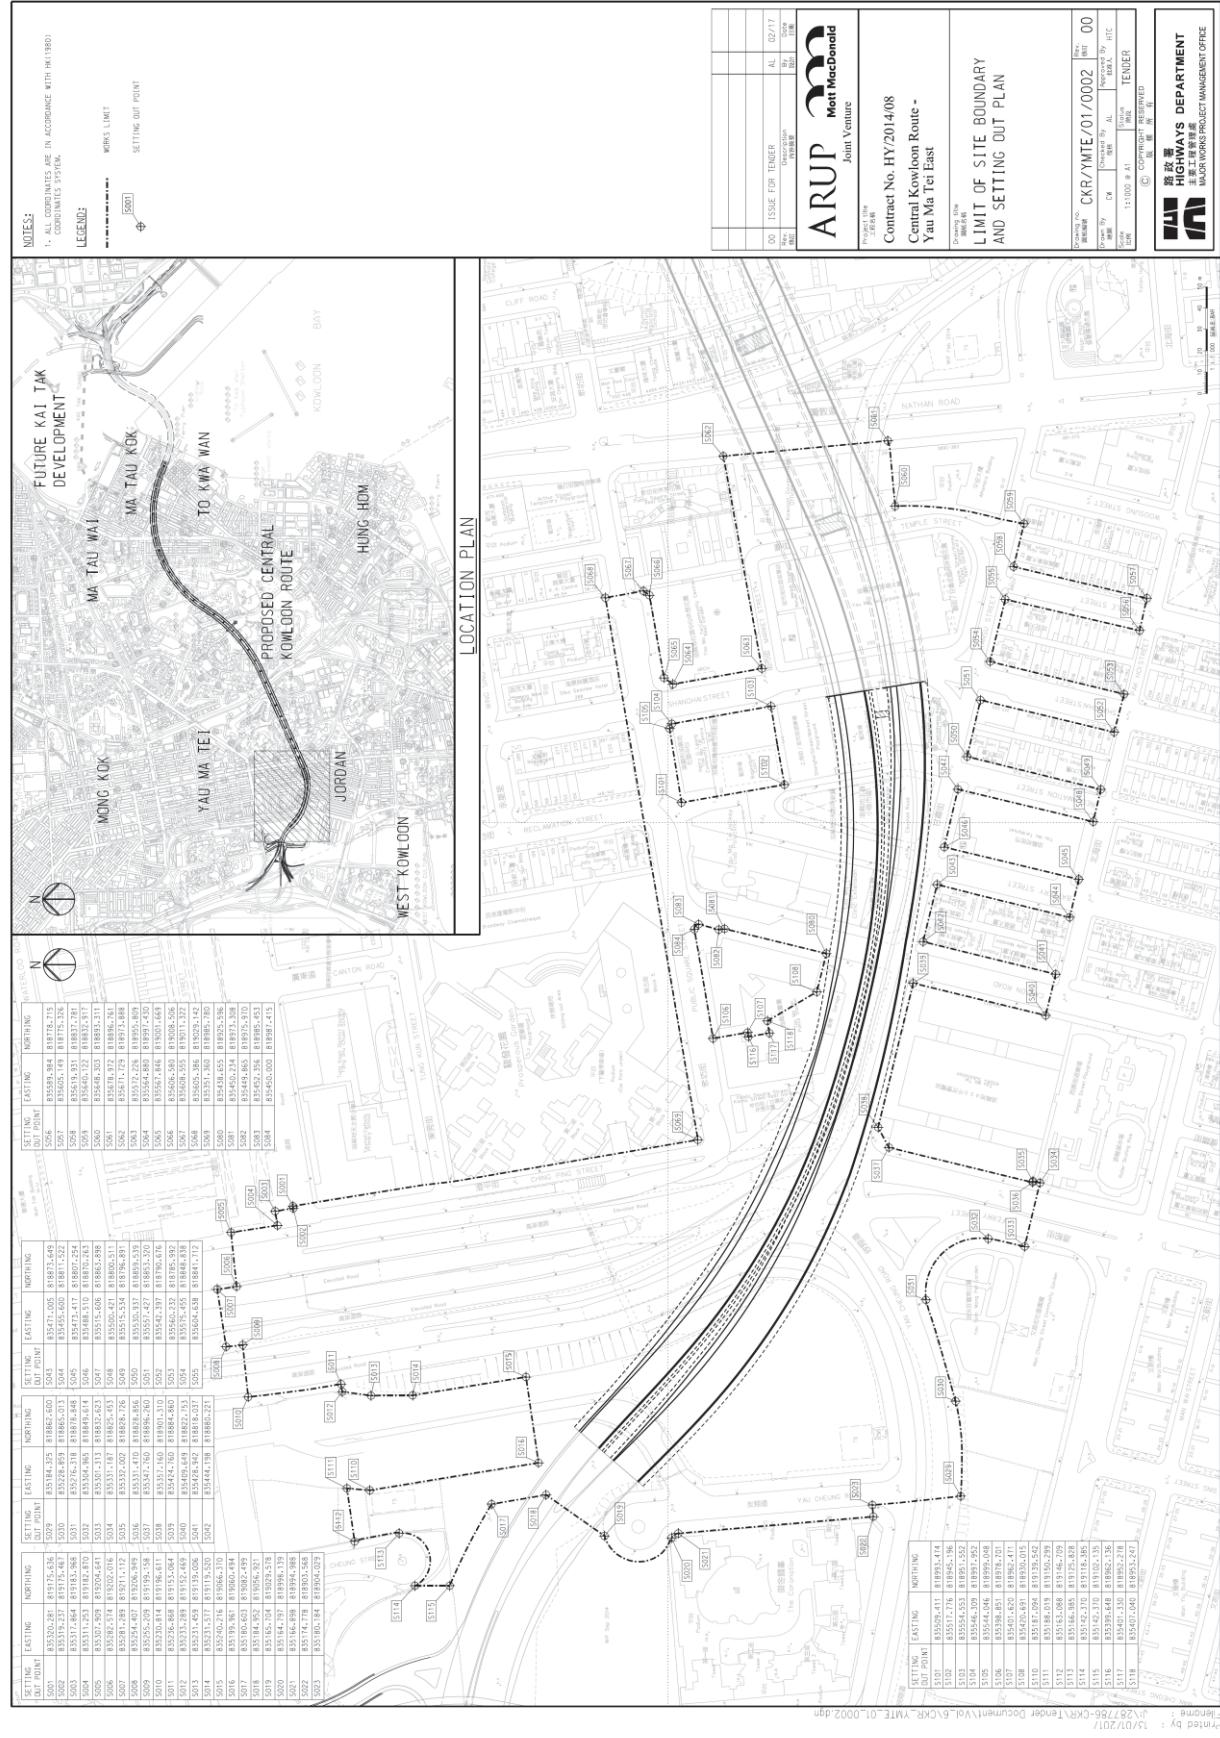

7. CONCLUSION AND RECOMMENDATIONS

- 7.1. This 16th monthly EM&A Report presents the EM&A works undertaken during the period from 1 July 2019 to 31 July 2019 in accordance with the EM&A Manual and the requirement under EP- 457/2013/C and FEP-02/457/2013/C.
- 7.2. Air quality (including 1-hour TSP and 24-hour TSP) and noise impact monitoring were carried out in the reporting period. No exceedance of the Action and Limit Level was recorded for air quality impact monitoring during the reporting period.
- 7.3. One exceedance of the Action Level of regular construction noise monitoring was recorded on 15 July 2019. Immediate actions have been taken. No further exceedance of the Action Level of regular construction noise monitoring was recorded during the remaining of the reporting period. No exceedance of the Limit Level of regular construction noise monitoring was recorded during the reporting period.
- 7.4. Due to the unstable air flow of high volume sample (HVS) plausibly caused by unstable electricity supply at W-A1, the 24-hour TSP result on 20 July 2019 had been voided.
- 7.5. Immediate checking on the air flow rate control component was conducted and the Contractor had been implemented to arrange electricity supply checking. The electricity supply was found normal, monitoring for 24-hour TSP was resumed and an additional monitoring was arranged on 23 July 2019 at W-A1 as a supplement to the voided monitoring result.
- 7.6. Scheduled monitoring for 1-hour TSP remained unaffected, only the schedule of 24-hour TSP was affected.
- 7.7. Weekly environmental site inspections were conducted during the reporting period. Joint site inspection with IEC were carried out on 11 July 2019. Minor deficiency was observed during site inspection and was rectified within the specified deadlines. The environmental performance of the Project was therefore considered satisfactory.
- 7.8. Two environmental complaints were received in the reporting month on 15 July 2019 from EP and 16 July 2019 from hotline (received on 29 July 2019 by ETL). After investigation with the Contractor and conclusion on 16 July 2019 and 7 August 2019 for the two complaints respectively, actions have been taken for both cases. The interim reports for the complaints are shown in Appendix Q. Further mitigation measures were implemented on site for precautionary purpose for the case received on 15 July 2019.
- 7.9. One non-compliance with the approved EIA Report and Noise Control Ordinance was spotted for the case received on 29 July 2019 by ETL, investigation finding showing the cause forcing the situation was included in the interim report. No further non-compliance situation was observed in the remaining of this reporting period.
- 7.10. No notification of summons or prosecution was received since commencement of the Contract.
- 7.11. The ET will keep track on the construction works to confirm compliance of environmental requirements and the proper implementation of all necessary mitigation measures.

	4000 Hz	± 0.10
104 dB	1000 Hz	± 0.05
114 dB	1000 Hz	± 0.05

The uncertainties are evaluated for a 95% confidence level.

Note:

The values given in this certification only related to the values measured at the time of the calibration and any uncertainties quoted will not allow for the equipment long-term drift, variations with environmental changes, vibration and shock during transportation, overloading, mis-handling, or the capability of any other laboratory to repeat the calibration. (A+A)*L shall not be liable for any loss or damage resulting from the use of the equipment.

CALIBRATION CERTIFICATE

Certificate Information

Date of Issue	11-Sep-2018	Certificate Number	MLCN182166S
---------------	-------------	--------------------	-------------

Customer Information

Company Name	Acuity Sustainability Consulting Limited
Address	Unit 1908, Nos. 301-305 Castle Peak Road, Kwai Chung, N.T.

Equipment-under-Test (EUT)

Description	Acoustic Calibrator
Manufacturer	Pulsar
Model Number	105
Serial Number	63705
Equipment Number	--

Calibration Particular

Date of Calibration	11-Sep-2018
Calibration Equipment	4231(MLTE008) / AV180068 / 13-May-20 1357(MLTE190) / MLEC18/05/02 / 25-May-19
Calibration Procedure	
Calibration Conditions	Laboratory Temperature $23^{\circ}\text{C} \pm 5^{\circ}\text{C}$ EUT Relative Humidity $55\% \pm 25\%$ Stabilizing Time Over 3 hours Warm-up Time Not applicable Power Supply Internal battery
Calibration Results	Calibration data were detailed in the continuation pages. Calibration result was out of EUT specification.

Approved By & Date

K.O. Lo

11-Sep-2018

Statements

- * Calibration equipment used for this calibration are traceable to national / international standards.
- * The results on this Calibration Certificate only relate to the values measured at the time of the calibration and the uncertainties quoted will not include allowance for the EUT long term drift, variation with environmental changes, vibration and shock during transportation, overloading, mishandling, misuse, and the capacity of any other laboratory to repeat the measurement.
- * MaxLab Calibration Centre Limited shall not be liable for any loss or damage resulting from the use of the EUT.
- * The copy of this Certificate is owned by MaxLab Calibration Centre Limited. No part of this Certificate may be reproduced without the prior written approval of MaxLab Calibration Centre Limited.

Certificate No. MLCN182166S

Appendix Q

Interim Report for the Complaint

Contract No. HY/2014/08
Central Kowloon Route, Yau Ma Tei East Section

Build King - SKEC Joint Venture

Interim Report on Environmental Complaint

Project	Central Kowloon Route, Yau Ma Tei East Section
Complaint Code	EC006-CKRYMTE20190713_001
Complaint description	<p>The complainant complained that the CKR project was seriously noisy, where opposite to Prosperous Garden in Yau Ma Tei. The duration was from 0800 to 18:00 every Saturday. The nearby residents were affected. The complainant requested the department to follow up to improve the noise problem.</p> <p>The complainant mentioned that “投訴人投訴中九龍幹線噪音嚴重，位置是油麻地區駿發花園對出，時間是每星期六0800左右開始到18:00，影響附近居民，要求部門跟進改善噪音問題。”</p>
Parameter	Construction Noise
Investigation finding	<p>Impact noise monitoring had been carried out on 9, 15 and 20 July 2019 and the monitoring results at Prosperous Garden Block 1 were 60.5, 58.2, 59.0, 60.2, 59.6 and 57.3 dB(A)_{5min}; 58.4, 60.5, 59.3, 59.6, 60.8 and 59.4 dB(A)_{5min}; 68.7, 67.3, 66.5, 66.5, 66.2, 66.7 dB(A)_{5min} respectively, which were well below the limit levels for the monitoring station at 75 dB(A)_{30min}. Similar works had been conducted throughout the week. It was believed that the construction noise generated on second and third week of July 2019 did not exceed the noise limit level as stipulated under EM&A manual.</p> <p>Noisy construction activities were restricted to be conducted within 7am to 7pm as per the Contractor's information under the stipulated NCO requirement.</p>
Actions taken / to be taken	As a precautionary measure, the Contractor had implemented some measures in respect to this complaint case in order to minimize nuisance to the public. The measures included rescheduling of the noisy construction works, installation of noise barrier mat to breaker head and intermittent operation of plants and equipment.
Remarks	<p>Construction works carried out on second and third week of July 2019:</p> <ul style="list-style-type: none">• Rebar fixing, sheet piling, concrete breaking, excavation at Zone A <p>Works locations: (next page.)</p>

Interim Report on Environmental Complaint

Project	Central Kowloon Route, Yau Ma Tei East Section
Complaint Code	EC007-CKRYMTE20190719_001
Complaint description	<p>A complaint from a member of the public through web to 1823 on 16/07/2019 (received on 29 July 2019 by ETL) with regard to the construction noise, light nuisance and design problem of road closure at the work site near Jade Hawker Bazaar on 13/7/2019 was received.</p> <p>The complainant mentioned that “本人於下午七時左右經過外面,看到工地有強光並發出噪音,多輛運石屎車在門口等待,但沒有臨時封路的設計,令甘肅街車轉道而行,引起阻塞。本人飯后八點再經過的情況一樣。聽到不停的噪音。”</p>
Parameter	Construction Noise, Site Lighting
Investigation finding	<p>The concrete pouring work was carried out on 13/07/2019 for the ground beams, which is a major structural element to support the existing Gascoigne Road Flyover (GRF). Owing to the mechanical problem of the concrete batching plant in the afternoon on that day, progress of the concreting work was dragged on by the poor supply rate of concrete. To ensure the structural integrity supporting GRF, concrete pouring works for the ground beams must be completed in one go on that day. This major “safety” consideration has forced the continuation of concrete pour even the time was beyond 7:00pm, and caused the lighting and noise nuisance to nearby sensitive receiver in evening time.</p> <p>Considering the current CNP at Zone E has not covered the use of concrete pump (qty: 1) and concrete lorry mixer (qty: max. 2 in operation) during restricted hour 1900-2330, the construction activities of concrete pouring at night of 13 July 2019 has breached and caused a non-compliance with the Noise Control Ordinance.</p>
Actions taken / to be taken	<p>The Contractor was advised to implement preventive measures to avoid overtime works for critical structure element causing by shortcoming of concrete supply. The Contractor has confirmed the below measures to be implemented in the future:</p> <ol style="list-style-type: none">1. Requesting concrete supplier to provide back-up batching lines and an exclusive production batching line which supply concrete solely to the Project site when needing large volume of concrete;2. Confirming the concrete supplier before commencing the work on each day to ensure adequate concrete supply rate to the site within the permitted working hours (07:00-19:00). <p>After 13/07/2019, concrete pouring works were carried out on 18/7, 25/7, 31/7, 3/8, 5/8, 6/8 and 7/8, where the concreting works of all of the above dates were completed before 7:00pm.</p>
Remarks	<p>Construction works carried out on restricted hour on 13/7:</p> <ul style="list-style-type: none">• Concrete pouring work for ground beams at Zone E <p>Works locations: (next page.)</p>
